COMPANY PROFILE INTRODUCTIONS

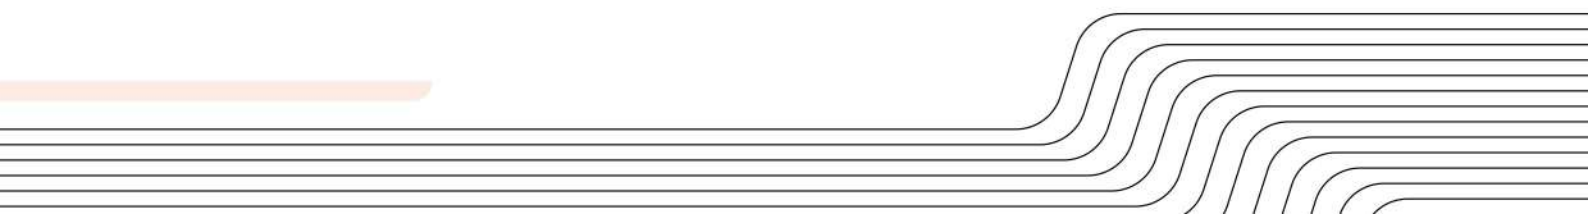

Perth Underground Power stands at the forefront of underground electrical and communications services, offering a comprehensive suite of solutions tailored to meet the diverse needs of our clients. Our core focus is on delivering projects with precision, safety, and reliability that exceed expectations in terms of budget and timeframes. Our dedication to upholding the highest standards of workmanship, ensures every project benefits from our team's expertise, which comprises only qualified and extensively trained professionals.

We believe in supporting the community by choosing locally sourced, highly accredited branded products, reflecting our commitment to quality and sustainability. Our wide array of services, coupled with our commitment to ongoing support, sets us apart in the industry. Whether it's a complex underground cabling project, NBN pit and pipe installations, or converting overhead lines to underground systems on an existing property, we have the capability and experience to handle it all. No project is too big or too small for us.

OUR STORY

Perth Underground Power emerged as a distinct and specialised company from Auslectrical, a WA-Owned electrical contracting company founded by Mourad Ishak. Mourad recognised a growing demand for his team's specialised underground electrical expertise and skills. From this he established a dedicated company that would focus on servicing a diverse range of clients across Perth and their underground power needs. Perth Underground Power is the trusted name that is synonymous for unparalleled quality, utmost safety, and cutting-edge solutions for underground electrical services.

OUR VISION & CULTURE

At Perth Underground Power, we are committed to delivering the benefits of highly efficient underground power and communications technology to our clients across Perth with the highest possible standards of safety and quality. We do this through ongoing training and support for our team to be the best that they can be, personally and professionally, this enables us to deliver outstanding service to our valued clients.

LOCATIONS

Perth Underground Power head office and workshop is located in Wangara WA. This allows us to provide our staff with the systems and tools to operate on work sites, to execute and complete day-to-day functions of the business locally. We find that this approach is the most efficient way for better client collaboration, communication and overall delivery of project outcomes.

CLIENTS WE SERVE

Perth Underground Power caters to a diverse range of clients looking to develop on brand new land and existing properties or looking to upgrade their power infrastructure on their property. As such, we serve the existing industries:

- Residential (Private)
- Commercial & Industrial
- Builders
- Developers
- Government & Local Council
- Engineers
- Property Consultants
- Surveyors
